RE: Compark Tract G, Parker, Colorado
Prairie Dog Inspection

Dear Ms. Myers:

On March 2, 2022, ERO Environmental Scientist Nancy Otterstrom conducted a site reconnaissance of the Compark South Tract G parcel for the sole purpose of identifying any prairie dog burrows or indications of prairie dog activity within the tract. The weather at the time of the site visit was sunny, temperature in the 40s (F), and no snow was observed on the property. The entire Compark South Tract G site was inspected on foot and no evidence of prairie dogs, burrows or mounds were observed. The entire lot was recently graded and seeded and erosion control infrastructure was observed in place along the southern tract boundary.

Thank you for the opportunity to assist you with this project. If you have any questions, please call me at (303) 903-8693.

Sincerely,

Jack Denman
Vice President/Geologist
