

RE: Site plane Adjustment for Trails at Crowfoot F2 and F3

Dear Stacey,

We are applying for a site plan adjustment for Trails at Crow Foot F2 and F3 Streetscape landscape plans. Current approved plans have trees in locations not feasible for planting due to water meters and gas lines being in the specified location. There is also not enough space to install any additional trees on the tree lawns. Currently each lot does have a minimum of one streetscape tree located in front.

Please consider with adjustment for final acceptance with the updated plans submitted.

Sincerely,

Staci Kahl
