CONTROL TECHNOLOGY

SPECIFICATIONS

CONSTRUCTION

- Outdoor lighting is a one-piece, die-cast low copper (10.8%) aluminum alloy with integral heat sink. The housing rotates against mounting arm housing to provide 5° to 10° adjustment with degree markers visible. All of adjustment is totally continuous from view above horizontal with fixture mounted in the downward position.
- Mounting arm housing is one-piece die-cast, low copper (10.8%) aluminum alloy with provisions for 8K mounting. Mounting arm fastens to the mounting plate with keyhole size flange both ends for securing and wiring. One stainless steel socket head screw secures the mounting arm housing to the mounting plate to rotate for aiming. Tightening the screws secures the housing lens frame together with seating provided by a silicone gasket. For visual aiming, adjustment may be accomplished with the feature on:
- Lens frame is a one-piece, die-cast low copper (10.8%) aluminum alloy with integral cooling fins to dissipate driver heat.
- Finish: fade and abrasion resistant, electrocoat/air applied, thermally cured, inorganic polyurethane (IPEC) powder polymer powdercoat.
- Backplate and hardware shall be stainless steel

OPTICS

- LED's mount to a metal printed circuit board as assembly (MCPCB).
- Optical lenses are clear injection molded PMMA acrylic.
- Secondary lens is impact resistant 180° tempered glass with anti-reflective coating.

INSTALLATION

- Junction box (by Other) Standard with steel, quick mount junction box plate that mounts directly to 4" x 8" box.
- Mounting plate is stainless steel and features a one-piece EPDM gasket on back side of plate to firmly seal fixture to wall surface, forestalling entry of moisture and particulates.
- Fixtures must be grounded in accordance with national, state and/or local electrical codes. Failure to do so may result in serious personal injury.

SERVICING

- Housing should hang freely in an open service position for inspection of primary wire connections. Once in service position, the housing can be removed for service by sliding the assembly to the left down mounting or to the right for up mounting and disconnecting the wiring plug.
- Driver assembly shall be mounted to a prewired internal tray with quick disconnects for removal.

ELECTRICAL

- Universal voltage, 120 through 277V with a 2% tolerance. Driver is Undervolts Laboratories listed.
- High voltage configurations, 347/480V, driver has a 0.2V dimming interface for multi-level illumination options. Driver is Undervolts Laboratories listed.
- "Thermal Shield", secondary side, thermostat provides protection for the sustainable life of LED module and electronic components.
- Drivers have a greater than a 0.9 power factor, less than 20% harmonic distortion, and are suitable for operation in -40°C to +40°C ambient environments.
- Luminaire shall be capable of operating at 100% brightness in a 40°C environment. Both driver and optical array have integral thermal protection that will dim the luminaire upon detection of temperatures in excess of 85°C.
- Modular wiring harness in the service enclosure provides user access to the dimming circuit.
