RE: Site Plan Adjustment Narrative

To Whomever it concerns,

The Site Plan Adjustments submitted here within include updates to building elevations, bench area relocation at Building # 4's courtyard, the plantings and one dog yard at Building #1. Please see an explanation of each of those changes below.

Regarding the Elevations we updated trim colors, adjusted the trim at the parapets and deleted the awnings.

Regarding the bench area at Building #4's courtyard, we shifted that location Southeast.

Regarding the plantings. We deleted the plants shown between the existing sidewalk Northeast of Building #4 and the retaining wall and we updated plant species.

Regarding the dog yard on the West side of Building #1, this one was deleted as it interfered with the retaining wall.

Sincerely,

A handwritten signature in black ink, appearing to read "Salil Nair", with a stylized flourish at the end.
