Re: Douglas 234 F6 A2, Case # SUB23-012

Public Service Company of Colorado's (PSCo) Right of Way & Permits Referral Desk has reviewed the replat for **Douglas 234 F6 A2**. The property owner/developer/contractor must complete the application process for any new natural gas service via xcelenergy.com/InstallAndConnect. It is then the responsibility of the developer to contact the Designer assigned to the project for approval of design details.

For additional easements that may need to be acquired by separate document for new facilities, the Designer must contact a Right-of-Way and Permits Agent.

Noted. We are only processing a replat, ie change to lot lines. Each individual lot will be required to process an SIP separately through the Town. At that time in the process each individual lot will process an application for service through Xcel
